

Electronic Accelerators - Rings

Electronic Section

- **Possibility to use electronics in more devices** - both for ring control and MERO 3 lever.
- The device is tested by authorized TÜV laboratory and has the appropriate homologation.

Mechanical Section

- **All parts are manufactured by our company** and they are always in stock.
- **We have a universal push ring attachment.** Ring mechanism can be mounted directly on the steering wheel rim. Ring can be assembled individually to all types of steering wheels.
- We also offer a **lateral move ring**. In some cases, it can also be fixed from the bottom of the steering wheel.
- We are able to manufacture the mechanism individually - e.g. a lever for the finger, motorcycle handle etc.
- The ring can be made of plastic or covered by leather.

Lateral move ring
